Title: ZORKO Sangli – Smart Café Digital Platform

1. Abstract:

In the rapidly growing digital environment, customers increasingly rely on online platforms to explore businesses, view products and services, access offers, and obtain location information. For cafés and food outlets, maintaining an effective digital presence is essential for improving customer engagement and providing convenient access to menu and outlet information.

This project proposes the development of a professional, responsive, and scalable web platform for ZORKO Café, Sangli. The system will provide customers with a centralized platform to explore the café, browse a digital menu, search and filter food items, view item details, discover current offers and combos, access location and contact information, view the gallery, connect through social media, and provide feedback.

The proposed system will also include an Admin Panel that enables authorized café staff to manage menu items, prices, food availability, offers, promotional banners, customer-facing information, and other website content efficiently. Additional features such as a QR-based digital menu, Trending/Best Seller section, Student Zone with special offers, Loyalty and Reward Program, and Live Item Availability will further enhance customer interaction and improve the overall digital experience.

The platform will be designed with a focus on responsive design, fast performance, usability, security, scalability, maintainability, accessibility, and search engine optimization. The system will also be designed to support future expansion, including online food ordering, payment integration, customer accounts, order tracking, and delivery management.

The objective of this project is to create an effective digital presence for ZORKO Sangli, improve customer engagement, simplify menu and content management, and provide a scalable foundation for future digital services.

2. Keywords:

Smart Café Platform, Digital Menu, Responsive Web Application, QR-Based Menu, Live Food Availability, Customer Engagement, Admin Panel, Offers and Combos, Loyalty and Reward Program, Search and Filter.

3.Objectives:

- To develop a responsive website for ZORKO Café, Sangli.
- To provide a digital menu with food items, offers, and café information.
- To develop an Admin Panel to manage menu, prices, offers, and availability.
- To add features like QR Menu, Live Availability, Best Sellers, and Student Offers.
- To build a user-friendly and scalable platform for future expansion.

4. Introduction:

In today’s digital environment, customers increasingly rely on websites and online platforms to explore cafés, view menus, discover offers, and access location and contact information. A strong digital presence helps cafés improve customer engagement and provide convenient access to their services.

ZORKO Café, Sangli requires a dedicated web platform that allows customers to easily explore food items, prices, offers, café details, and other services. The proposed system will provide a centralized digital platform with features such as a digital menu, search and filter options, food details, offers and combos, location information, social media links, reviews, and a QR-based menu.

The system will also include an Admin Panel to manage menu items, prices, availability, offers, banners, and other café information. The proposed platform aims to provide a user-friendly, responsive, and scalable solution that improves customer interaction and strengthens the digital presence of ZORKO Sangli.

5. Methodology

Website Start

- User opens the ZORKO Sangli website.
- User accesses the home page.
- The home page displays branding, featured items, offers, timings, and quick links.

Digital Menu Module

- User browses different food categories.
- Food items display images, descriptions, and prices.
- User can view item details and availability.
- QR code can be scanned to directly access the digital menu.

Search & Filter Module

- User searches for food items.
- Food items can be filtered based on:
- Category
- Price
- Popularity
- Available offers

Food Details & Offers Module

- User selects a food item.
- System displays detailed information.
- Customization and add-on options are shown.
- Related items, combos, and current offers are displayed.
- Trending and best-selling items are highlighted.

Contact & Location Module

- User can access café contact details.

- WhatsApp and social media links are provided.
- Café location is displayed using Google Maps.
- Users can view gallery images and customer reviews.

Admin Module

- Admin logs into the admin panel securely.
- Admin can manage:
- Menu items
- Prices
- Food availability
- Offers and combos
- Promotional banners
- Café information

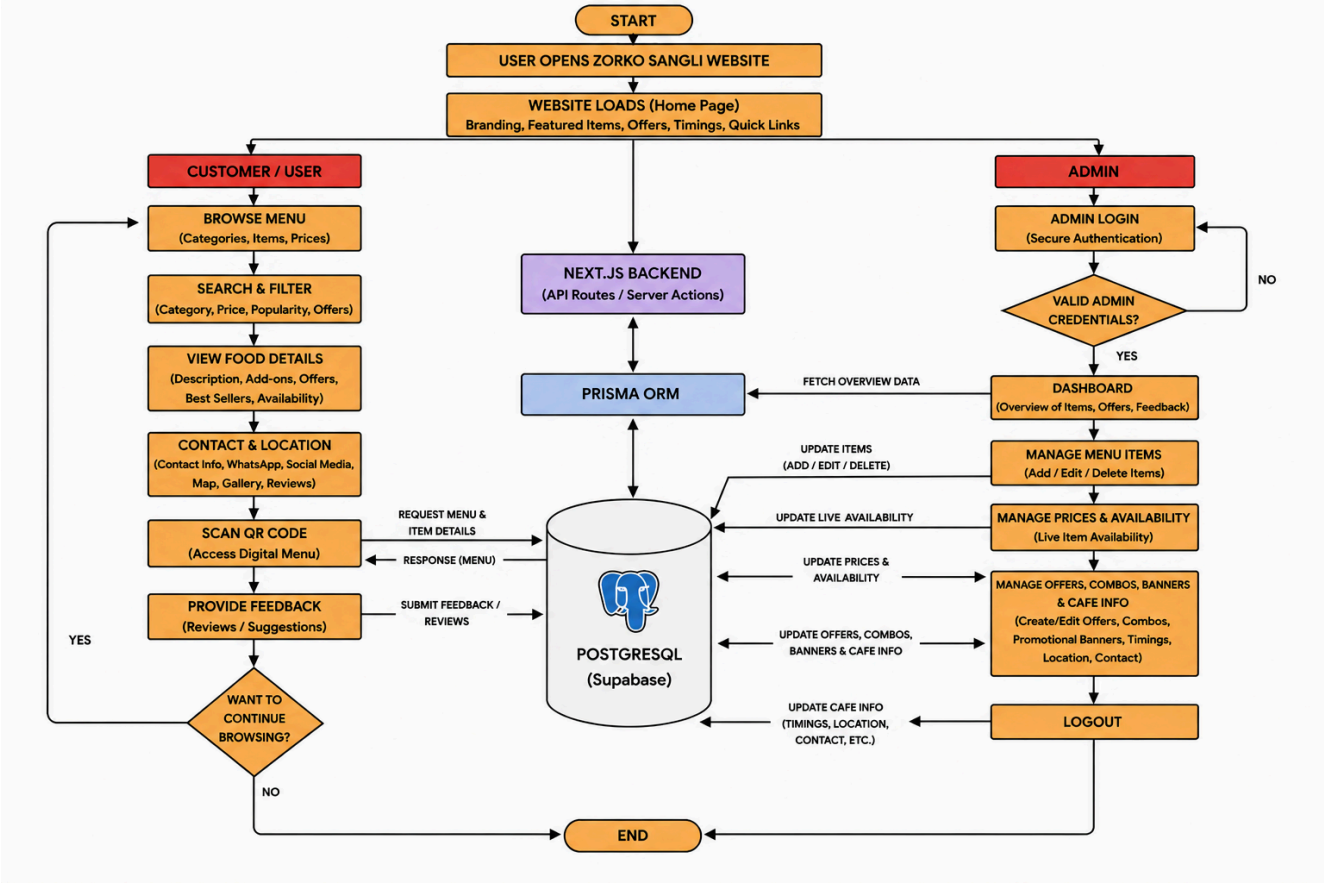

Data Management

- All menu and website information is stored in a centralized database.
- Admin updates are reflected on the website.
- Live availability ensures customers can view the current status of food items.
- The system provides organized and easy management of café content.

Responsive & Scalable System

- The website is accessible on mobile, tablet, and desktop devices.
- The system is designed for fast and user-friendly navigation.
- The platform can be extended in the future with:
- Online ordering
- Online payment
- Customer accounts
- Loyalty and reward program
- Food delivery and order tracking

6. Flowchart:

START
USER OPENS ZORKO SANGLI WEBSITE
WEBSITE LOADS (Home Page)
Branding, Featured Items, Offers, Timings, Quick Links
CUSTOMER / USER
BROWSE MENU
(Categories, Items, Prices)
SEARCH & FILTER
(Category, Price, Popularity, Offers)
VIEW FOOD DETAILS
(Description, Add-ons, Offers, Best Sellers, Availability)
CONTACT & LOCATION
(Contact Info, WhatsApp, Social Media, Map, Gallery, Reviews)
SCAN QR CODE
(Access Digital Menu)
PROVIDE FEEDBACK
(Reviews / Suggestions)
YES
WANT TO CONTINUE BROWSING?
NO
NEXT.JS BACKEND
